

Call for Applications: Tenure Track Assistant Professor or
Associate Professor Positions

1. Position and Qualification

1-1. Position: Assistant Professor (tenure-track position) or Associate Professor (tenure-track position)

1-2. Number of open positions: one

1-3. Affiliation: Advanced health care science unit in Innovative Integrated Bio-Research Core in the Institute for Frontier Science Initiative.

1-4. Role:

Principal Investigators (PIs) who are assigned as Assistant or Associate Professor of these open positions are obliged to vigorously promote inter-, cross-, and multi-disciplinary researches..

1-5. Type of employment: Full-time

1-6. Term of office: Five years from the date of appointment

1-7. Salary: Annual salary system of Kanazawa University

1-8. Reappointment and promotion:

Based on the result of intramural examination on academic achievement in research and activity in education, he/she may have opportunity for the reappointment or the promotion to a tenure researcher, after the expiration of one's term of office.

* Outline for the standard in making decision on the approval of academic tenure:

(1) Scientific achievement in the concerned field is outstanding in both domestic and international research communities.

(2) Appropriately planned research is sufficiently achieved.

(3) He/she obtains sufficient competitive research funding and performs high research activities.

1-9. Incentive:

The expected financial support for each researcher is about ¥1,000,000 per year, and this lasts for at least for 5 years as far as you are employed.

2. Research area

The Advanced health care science unit is an academic field involving interdisciplinary research into theories and methods for the recovery, maintenance and promotion of human tissue viability. In the first step, we focus on the bacterial diversity on the interface area such as skin, oral or nasal cavity and we elucidate the mechanism of how its dysregulation causes the opportunistic infection and related risk and/or prognosis factors in the individuals' health status, life style and environment. The task of the new tenure-track assistant or associate professor would be the investigation of the mechanism of how its dysregulation causes the opportunistic infection and the development of non –invasive and practical technic for evaluating the health care for reliving or overcoming of the health problems.

3. Arrival time at the post

At the earliest possible date on or after February 1st, 2018

4. Qualifications

- (1) Applicant must be an excellent researcher who has research achievement in the research area described above and have the ability to drive his/her research project as Assistant or Associate Professor.
- (2) Applicant must have a Ph.D. degree

5. Documents for application (documents must be written in Japanese or English)

- | | |
|---|-------|
| (i) Curriculum vitae | 1 set |
| (ii) Publication list (original papers(with Impact Factor 2016),
review articles, etc) | 1 set |
| (iii) Reprint(s) of main original papers [5 paper] (copy is permitted) | 1 set |
| (iv) Outline of past research
(about 1,200 characters in Japanese or 500 words in English) | 1 set |
| (v) Research aim and project after arrival to this position
(about 1,200 characters in Japanese or 500 words in English) | 1 set |
| (vi) List of external research funds acquired by applicant | 1 set |
| (vii) Name and address of two researchers whom one can
be inquired about applicant | 1 set |

* E-mail address and contact address must be provided in the curriculum vitae.

* Submit hard copies to the mailing address provided below. Electric data of these documents also must be submitted.

6. Deadline for application

September 29th, 2017 Time: 17:00 Japan Time (must be received no later than this time)

7. Others
